

Thieme e-book library: trial

Center of Scientific Information has prepared a trial till the end of December into e-books collection [by Thieme](#). This is a unique collection of illustrated, full-color [textbooks and atlases](#) of medicine primarily intended for foreign students (not only). It covers virtually all subjects taught at medical schools and is thus a great resource for teaching and learning in medicine. Trial access is realized from IP addresses of faculty and medical hospital in Pilsen.

Since January 2017 namely Faculty of Medicine in Pilsen will have paid for the same access to this collection and you have the opportunity, thanks to the trial, to really try the e-books in advance.
