

Chaperon Newsletter No. 05/2021

[Characterization of rare germline variants in familial multiple myeloma](#)

Multiple myeloma (MM) is a malignancy of plasma cells, characterized by the presence of monoclonal immunoglobulin, known as M protein.

[DNA repair gene polymorphisms and chromosomal aberrations in healthy, nonsmoking population](#)

Nonspecific structural chromosomal aberrations (CAs) can be found at around 1% of circulating lymphocytes from healthy individuals but the frequency may be higher after exposure to carcinogenic chemicals or radiation.

Invitation:

[ERA Research Club](#)

The Chaperon project invites you to several upcoming events:

- **Small animal experiments.** A lecture by Prof. Dr. med. Uta Dahmen. July 7, 2021, 9:00–10:00 a.m.
- **Introduction to statistics for biomedicine.** A seminar by Dr. Petr Hošek. Two identical sessions, July 8 and 9, 2021, 1:00–3:00 p.m.
- **The challenge of anastomotic leaks and The importance of teamwork in rectal cancer surgery.** A series of two lectures by Prof. Steven D. Wexner. July 12, 2021, 1:00–2:00 p.m. CET and July 13, 2021, 1:00–2:00 p.m. CET. ONLINE.
- **Limits of pancreatic surgery.** A lecture by seminar by Prof. Dr. med. Pierre-Alain Clavien. July 14, 2021, 9:00–10:30 a.m..
- **Survival in cancer.** A lecture by Prof. Kari Hemminki. July 14, 2021, 10:30–11:15 a.m.
- **Surgical material design and development.** A lecture by Prof. Dr. Inge Herrmann. July 14, 2021, 11:15 a.m.–12:30 p.m.

More information about the events can be found [here](#).

ERA Chair Position for Excellent Research in Oncology

A project funded from the European Union's Horizon 2020 research and innovation programme under grant agreement No 856620.
